🔗 Live Demo 📍 Seoul, South Korea — Available for full-time remote work with EMEA teams

EXPERIENCE

HR and Trade Operations Specialist

KUM YOUNG VINA

Dec 2018 – Sep 2021 | Dong Nai, Vietnam

- Managed HR payroll and visa-related administration for approximately 12 Korean employees.
- Managed relationships with a portfolio of 98 buyer accounts (83 domestic, 15 international) for dyeing and printing textile exports, covering pricing, product, and account management.
- Coordinated documentation, financial records, and operational communication between Korean headquarters and the Vietnam site.
- Reduced overdue export payments across the buyer portfolio by proactively tracking accounts and coordinating follow-up with cross-functional stakeholders.
- Drew on nearly 3 years of cross-border coordination experience to build documentation and communication habits that now support collaboration with distributed, multi-timezone engineering teams.

EDUCATION

KPMG TechLab — ESG Data-Based Full-Stack Developer Program (Apr–Nov 2025): Java, Python, React, AWS, GCP, Kubernetes, data analysis.

AI-Applied Software Development & Big Data Program (Feb–Aug 2022): Java, Flutter, R, Python, ML/DL fundamentals.

University of Michigan | Coursera — Statistics with Python Specialization (Apr 2024).

Silla University — B.A. International Relations, Minor in International Trade (2013–2018).

PROJECTS

KoreanMate — AWS Serverless and Kubernetes Platform

AI-powered Korean learning platform implemented using two infrastructure models: AWS Serverless and Amazon EKS

AWS Serverless Architecture

- Designed a serverless architecture (API Gateway, Lambda, DynamoDB, Cognito, Bedrock) to cut always-on costs — delivered in 4 weeks with 3 AI features across 7 backend API endpoints.
- Implemented Cognito sub-based user data isolation and daily usage limits, and automated provisioning and deployment with Terraform and GitHub Actions using OIDC-based temporary credentials.
- Applied layered security (WAF, KMS, SSM Parameter Store) and cost controls, including a $10/month AWS Budgets threshold, 14-day log retention, and DynamoDB TTL cleanup.
- Set up monitoring and alerting with CloudWatch, X-Ray, and SNS, and documented architecture decisions, request flows, and troubleshooting cases.

Amazon EKS / Kubernetes Architecture

- Architected an Amazon EKS environment (Deployment, Service, Ingress, ServiceAccount) to practice Kubernetes operations and container orchestration.
- Containerized the backend with Docker, stored images in Amazon ECR, and exposed the app via ALB Ingress through AWS Load Balancer Controller.
- Configured IRSA for pod-level AWS access to DynamoDB, SSM Parameter Store, and Bedrock, and used Argo CD for GitOps-based deployment with Prometheus, Grafana, and Trivy for observability and security scanning.
- Established a structured cost-cleanup workflow (validate → capture evidence → document → decommission) to avoid ongoing charges.

SUMMARY

Junior Cloud/DevOps Engineer who built and compared two AWS architectures — Serverless and EKS — and made the cost-driven call to decommission EKS after validation. AWS Certified Solutions Architect – Associate with a background in international operations. Seeking a remote Cloud/DevOps role with an EMEA-based team.

SKILLS

Cloud & IaC
AWS · Terraform

Containers & Orchestration
Docker · Kubernetes · Amazon EKS

Serverless & Backend
AWS Lambda · API Gateway · DynamoDB · Cognito · S3 · CloudFront · Amazon Bedrock

CI/CD & Security
GitHub Actions · GitHub OIDC · Argo CD · AWS IAM · IRSA · WAF · KMS · SSM Parameter Store · Trivy

Observability & Cost
CloudWatch · AWS X-Ray · Prometheus · Grafana · AWS Budgets · DynamoDB TTL

Programming & Tools
TypeScript · JavaScript · Python · Java · Node.js · Express · React · DynamoDB · MariaDB · Linux · Git

CERTIFICATIONS

AWS Certified Solutions Architect – Associate
Amazon Web Services | Earned May 2026

LANGUAGES

Korean Native
English Intermediate working proficiency
